

2002 SEED SUMMARY REPORT INSPECTION RESULTS

**PLANT INDUSTRIES DIVISION
BUREAU OF FEED AND SEED**

LOWELL MOHLER, DIRECTOR

Missouri Department of Agriculture Mission Statement

To serve, promote, and protect the agricultural producers, processors,
and consumers of Missouri's food, fuel, and fiber products.

FOREWORD

The seed report is comprised of two sections.

Section One is intended to show the reliability of labelers in meeting their claims for seed quality. Inspections listed in this section were planned on random basis, with no intentional bias, for the purpose of providing a means of comparing each labeler's reliability in meeting claims. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent the labeler's actual performance.

Section Two is comprised of selective inspections designed specifically to curtail labeling and licensing violations of Seed Law. Examples of violations are selling seed without a seed permit, selling seed out of test date, and labeling omissions or inconsistencies with the law.

Stop sales are debited to the labeler if a discrepancy from the labeler's claim is found. If a lot of seed is found to be offered for sale past the time allowed on the existing germination test date, that violation is charged against the possessor of the seed. Violations recorded against the possessor of the seed are listed in Section Two.

All inspections were performed to fulfill the regulatory responsibilities given the Missouri Department of Agriculture by the Missouri Seed Law, Statute Sections 226.011 through 266.111 (RSMo 2000).

INTRODUCTION

The Missouri Department of Agriculture, Plant Industries Division, Bureau of Feed and Seed is pleased to publish the 2002 Seed Summary Report and Inspection Results.

The quality of seed in Missouri in 2002 was improved compared to 2001. Three thousand three hundred fifty eight (3,358) lots of seed were officially sampled and tested. One hundred fifty one (151) Stop-Sale Orders were issued for seed failing to meet its labeled guarantees. This resulted in a compliance rate of 95.50% compared to 93.72% in 2001.

The Missouri Seed Control Laboratory tested 1237 service samples in 2002. A total of 4,595 seed samples were tested in 2002 resulting in a total of 10,868 individual tests performed.

Free testing of out of date (germination) of retail or wholesale carry over seed will be discontinued in 2003 due to budget restraints. Free testing of unlabeled seed not intended for resale, but intended for planting on a Missouri farm operated by the requester will be done during the periods of June 1 to August 31 and November 1 thru January 15.

All seed retailers are required to have their on-hand carry over seed retested for germination every 10 months (counting the month the seed was retested.) The new test date must appear on all labels. Lots of seed found to be out of test date will be placed on Stop Sale Order until such time as the seed has been tested and new test date is placed on label with any change in germination rate or the seed is disposed of in an acceptable manner. In 2002, 76 field written Stop Sale Orders were issued mainly on out of test date seed.

The Bureau of Feed and Seed offers many seed sampling and seed testing services. The charges for analysis and analytical reports on seed samples are listed in the Missouri Seed Law Rules 2CSR 70-35.050.

TRUENESS-TO-VARIETY TESTING PROGRAM FOR 2003

The Seed Regulatory and Testing Branch will be conducting Trueness-to Variety (TTV) field trials again in 2003.

We request your help again by submitting official samples for the field trials. The crops will be soybeans, spring small grains (wheat, barley, oat, rye, triticale) and the cole crops (cabbage, broccoli, cauliflower, collards.) The soybeans will be tested for Roundup resistance, as well as variety, and the cole crops will be a fall planting. The test sites, crops, cut-off dates and minimum sample sizes are given on the attached table.

For each sample we need to know the kind, variety name (as labeled), hybrid (if hybrid), and some identifying number. Lot number and brand are helpful. Any special comments are also welcome.

We emphasize interstate shipments, but this is not required. We are able to take quite a few samples, so don't be shy.

This program is intended for enforcement of Federal Seed Act variety labeling provision, and we hope may be of service to you in enforcing your State Seed Control Programs. Thank you for your continuing interest and participation in the program.
